

Date: July 18, 2018
Subject: Relief Valve Part Numbers

Mueller Refrigeration is announcing a revision to all part numbers in the relief valve product line offering.

Previously, a prefix has been used in the second position of the Mueller part number to designate the pressure setting of the desired valve.

Example: AD15502, where D represented 235 psig.

Effective Monday, July 23rd, the prefix will be eliminated, and the numeric pressure setting will be added to the end of the valve's part number.

Example: A 15502-235

All open Mueller sales orders must be revised to reflect the new part number, prior to shipment and invoicing.

Relief valves will be offered in select settings. A complete list of relief valve offering is included with this announcement.

If you have any questions, please contact your local sales representative or customer service representative at 800-251-8983.
