Mueller Refrigeration's A 16447 ¼" Flare Seal Cap Assembly features precision-engineered internal geometries, meticulously optimized to ensure consistent retention of the integrated O-ring seal across temperature/pressure operational range. Unlike conventional designs, the Mueller Refrigeration geometry significantly enhances O-ring stability, preventing dislodgement. The advanced design delivers superior sealing integrity and unmatched reliability in high-performance applications.

Mueller Refrigeration, LLC is committed to providing components that meet the highest industry standards for safety and performance. Please contact your Mueller Sales Representative for further information.
